Experience

Senior Software Consultant

Self Employed

Sep 2023 - Present (2 months)

Currently working as an independent software developer contractor, my main client is Advarra. Advarra makes clinical research safer, smarter, and faster with their software products that aim to aid clinical researchers.

Technologies used: Ruby on Rails, Vue.js, JavaScript, Redis, Rspec, Jest, PostgreSQL, Python

AVID GAMING

Senior Ruby Developer

Avid Gaming

Feb 2023 - Sep 2023 (8 months)

Avid Gaming is an established and dynamic e-gaming company committed to providing excellent customer service to a large Canadian customer base. My responsibilities here included:

- Develop and maintain backend systems and APIs for an e-gaming platform, ensuring high performance, scalability, and security.
- Collaborate with cross-functional teams to implement new features and functionalities.
- Conduct code reviews, perform testing, and troubleshoot issues to ensure the stability and quality of the gaming platform.

Some of the technologies I use here include: Ruby on Rails, Vue.js, Redis, Rspec, Jest, TypeScript, SQLServer, Sidekiq, SQL, HTML, CSS

Junior Software Engineer

Advarra

Jan 2021 - Feb 2023 (2 years 2 months)

Worked as a Software Engineer in a Ruby on Rails and Vue.js environment. Some of my responsibilities here included:

- Designing, developing and maintaining web applications using a Ruby on Rails backend and Vue.JS frontend.
- Writing and maintaining reliable Ruby code with appropriate tests.
- Creating and maintaining any required documentation.
- Creating components for back-end services.
- Creating and updating front-end components, transforming figma UI designs into front-end views.
- Maintaining software APIs.

Technologies used: Ruby on Rails, Vue.js, JavaScript, Redis, Rspec, Jest, PostgreSQL, Python

Automated Test Engineer

Longboat

Apr 2019 - Jul 2019 (4 months)

The team used Agile methodologies, and my typical day would include daily standups, code reviews, helping the team with remaining tasks, looking at failures, and even some manual testing. Some of my responsibilities here included:

- Creating and maintaining a keyword driven automated test framework.
- Creating a suite of automated tests for developed software components.
- Leading issue resolution for bugs identified during test phases.
- Creating and maintain any required test documentation.

Technologies used: Python, Selenium, RobotFramework, Jenkins, PostgreSQL

Education

University of Limerick

Honours Bachelors degree, Computer Games Development

Jan 2018 - Jul 2022

Skills

Ruby • Ruby on Rails • Python (Programming Language) • Java • JavaScript • Vue.js • Redis • PostgreSQL • Selenium • Robot Framework
